1. Summary

There are two printer drivers by 32/64bit OS. Similarly, there is two status API of CyStat.Dll and CyStat64.Dll by 32/64bit driver. When installing the application, it is necessary to determine if the OS is 32/64 bit, and install the corresponding dll.

2. About the distinction of 32/64bitOS

The following descriptions are examples of distinguishing OS by using the command script.

```
@if /I "%PROCESSOR_ARCHITECTURE%" == "AMD64" (
        Please describe the installer start processing for 64bit OS.
        (For instance, setup.exe、setup package or other starts are written.)
) else if /I "%PROCESSOR_ARCHITECTURE%" == "X86" (
    @if /I "%PROCESSOR_ARCHITEW6432%" == "AMD64" (
        Please describe the installer start processing for 64bit OS.
        (For instance, setup.exe、setup package or other starts are written.)
    ) else (
        Please describe the installer start processing for 32bit OS.
        (For instance, setup.exe、setup package or other starts are written.)
    )
)
```

Information on the 32/64 bit OS determination by the command script is available at the following URL (As of May 2013).

http://msdn.microsoft.com/en-us/windows/hardware/gg463027.aspx (English)
http://msdn.microsoft.com/ja-jp/windows/hardware/gg463027.aspx (Japanese)

The setup package can be made with Visual Studio or other tools. Information on the setup package is available at the following URL (As of May 2013).
